

MATC offers a variety of workshops and seminars that provide information about Autism Spectrum Disorders for parents, caregivers, day care workers, educational assistants, teachers, resource teachers, and other professionals. **Beyond the Basics** takes an in-depth look at some of the common challenges that are faced by people who have Autism Spectrum Disorder. New topics are added each year.

“Visuals and Communication Strategies”
will include:

Whether verbal or non-verbal, individuals with Autism Spectrum Disorder are visual learners, and using visual strategies on a daily basis enriches their lives. Participants will learn about a variety of visual tools for all skill levels. Tips on how to successfully implement visual tools will be shared. Using visual strategies enhances comprehension, receptive and expressive communication, educational participation, self-regulation and much more.

“Self-Regulation” will include:

This workshop is designed for all working within the educational system. It will clearly explain self-regulation/executive functions and how it develops across the five domains: biological, emotional, social, cognitive, pro-social. We will discuss factors affecting typical growth and strategies to develop greater self-regulation in a school setting.
